

## Original papers

Money matters: what to look for in an economic analysis

Outcome of rotational acetabular osteotomy for early hip osteoarthritis secondary to dysplasia related to femoral head shape: 49 hips followed for 10–17 years

Catastrophic failure of 4 cobalt-alloy Omnifit hip arthroplasty femoral components

Treatment of acute distal femur fractures above a total knee arthroplasty: Systematic review of 415 cases (1981–2006)

284 press-fit Kinemax total knee arthroplasties followed for 10 years: Poor survival of uncemented prostheses

Quadriceps force during knee extension after non-hinged and hinged TKA: An in vitro study

Insufficient recovery of neuromuscular activity around the knee after experimental anterior cruciate ligament reconstruction

Inferior fixation with a new pin design for external fixation: A randomized study in 50 patients operated on by the hemicallotaxis technique

Comparison of serial casting and stretching technique in children with congenital idiopathic clubfoot: Evaluation of a new assessment system

Open-door laminoplasty for multilevel cervical spondylotic myelopathy: Good outcome in 12 patients using suture anchor fixation

Supplementary pedicle screw fixation in spinal fusion for degenerative spondylolisthesis in patients aged 65 and over: Outcome after a minimum of 2 years follow-up in 82 patients

Surgical treatment of posttraumatic stiffness of the elbow: 2-year outcome in 21 patients after a column procedure

Forearm bone-anchored amputation prosthesis: A case study on the osseointegration

Cement is recommended in intralesional surgery of giant cell tumors: A Scandinavian Sarcoma Group study of 294 patients followed for a median time of 5 years

Pulse-lavage washing is an effective method for defatting of morse-lized allograft bone in the operating theater

Temporal and spatial expression of BMP-2 in subchondral bone of necrotic femoral heads in rabbits by use of extracorporeal shock waves

Platelet-rich plasma accelerated surgical angiogenesis in vascular-implanted necrotic bone: An experimental study in rabbits

Additive effects of PTH and bisphosphonates on the bone healing response to metaphyseal implants in rats

Cellular, matrix, and growth factor components of the joint capsule are modified early in the process of posttraumatic contracture formation in a rabbit model

Neuronal regeneration in denervated muscle following sensory and muscular neurotization

Statins attenuate polymethylmethacrylate-mediated monocyte activation

High body mass index is associated with increased risk of implant dislocation following primary total hip replacement: 2,106 patients followed for up to 8 years

## Erratum
