

Original papers

- Accelerated perioperative care and rehabilitation intervention for hip and knee replacement is effective: A randomized clinical trial involving 87 patients with 3 months of follow-up
Self-reported functional outcome after primary total hip replacement treated with two different perioperative regimes: A follow-up study involving 61 patients
Predictors of length of stay and patient satisfaction after hip and knee replacement surgery: Fast-track experience in 712 patients
Local infiltration analgesia: a technique for the control of acute postoperative pain following knee and hip surgery: A case study of 325 patients
Good results with an uncemented proximally HA-coated stem in hip revision surgery: 62 hips followed for 2–13 years
Excellent long-term survival of an uncemented press-fit stem and screw cup in young patients: Follow-up of 75 hips for 15–18 years
Custom-design implants for severe distorted proximal anatomy of the femur in young adults followed for 4–8 years
Dislocation of hemiarthroplasty after femoral neck fracture: Better outcome after the anterolateral approach in a prospective cohort study on 739 consecutive hips
A new approach for assessment of wear in metal-backed acetabular cups using computed tomography: A phantom study with retrievals
Transsection of the rectus abdominis muscle in the treatment of acetabular fractures: Operative technique and outcome in 21 patients
Survival of closing-wedge high tibial osteotomy: Good outcome in men with low-grade osteoarthritis after 10–16 years
Assessment of leech therapy for knee osteoarthritis: A randomized study
Improved data illustration in complex multi-ligament knee reconstruction surgery: Using the historical principles of Florence Nightingale and John Venn
Shockwave therapy for chronic Achilles tendinopathy: A double-blind, randomized clinical trial of efficacy
The foot: still the most important reason for walking incapacity in rheumatoid arthritis: Distribution of symptomatic joints in 1,000 RA patients
Osteotomy of dorsally displaced malunited fractures of the distal radius: No loss of radiographic correction during healing with a minimally invasive fixation technique and an injectable bone substitute
Long-term cost and effect on quality of life of osteoporosis-related fractures in Sweden
Polymethylmethacrylate particles stimulate bone resorption of mature osteoclasts in vitro
Absence of lymphatics at the bone-implant interface: Implications for periprosthetic osteolysis
Sustained release of ciprofloxacin from an osteoconductive poly(DL)-lactide implant
Persistence of bacterial growth on antibiotic-loaded beads: Is it actually a problem?
