

Original papers

- Total hip replacement in the congenitally dislocated hip using the Paavilainen technique: 19 hips followed for 1.5–10 years
- Cementless total hip arthroplasty in patients with severely dysplastic hips and a previous Schanz osteotomy of the femur: Techniques, pitfalls, and long-term outcome
- Stem subsidence of polished and rough double-taper stems: In vitro mechanical effects on the cement-bone interface
- Mathematical evaluation of jumping distance in total hip arthroplasty: Influence of abduction angle, femoral head offset, and head diameter
- Influence of head size on the development of metallic wear and on the characteristics of carbon layers in metal-on-metal hip joints
- Periprosthetic DXA after total hip arthroplasty with short vs. ultra-short custom-made femoral stems: 37 patients followed for 3 years
- Distal femoral stem–bone anchorage of a cementless revision total hip arthroplasty: Evaluation of 14 patients by CT
- A new measurement for posterior tilt predicts reoperation in undisplaced femoral neck fractures: 113 consecutive patients treated by internal fixation and followed for 1 year
- Differences in hip bone mineral density may explain the hip fracture pattern in osteoarthritic hips
- What is the role of clinical tests and ultrasound in acetabular labral tear diagnostics?
- Finite element analysis of the effect of cementing concepts on implant stability and cement fatigue failure
- Incidence of genetic polymorphisms involved in lipid metabolism among Chinese patients with osteonecrosis of the femoral head
- C-reactive protein levels after 4 types of arthroplasty
- Similar clinical outcome after unicompartmental knee arthroplasty using a conventional or accelerated care program: A randomized, controlled study of 40 patients
- Growth rate after limb deformity correction by the Ilizarov method with or without knee joint distraction: Lengthening in 30 children followed for at least 2 years
- Surgery for scapula process fractures: Good outcome in 26 patients
- The Bankart repair versus the Putti-Platt procedure: A randomized study with WOSI score at 10-year follow-up in 62 patients
- Effects of crystalline glucocorticoid triamcinolone acetonide on cultured human supraspinatus tendon cells
- The effect of glucocorticoids on tendon cell viability in human tendon explants
- Long-term outcome of displaced radial neck fractures in adulthood: 16–21 year follow-up of 5 patients treated with radial head excision
- Hereditary hemochromatosis: a neglected diagnosis in orthopedics: A series of 7 patients with ankle arthritis, and a review of the literature
- External fixation compared to intramedullary nailing of tibial fractures in the rat
- Illness behavior in patients on long-term sick leave due to chronic musculoskeletal pain
